

## Annex J.1 – Environmental and Sustainability Assessment Scoping Report Representations Summary and Responses

Table 1 – Agree that the sustainability objectives and impact pathways identified for each topic area in the SEA and SA scoping report adequately

Unique ID Reference	Summary of Issue	Response
CR36	Agrees with the objectives but provided no justification.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
WR53	Supports the main objectives highlighted against each of the environmental topics (climate, air, water, nature and land resources). States the questions being asked regarding what the implementation of the objectives will lead to, is satisfactory. However, considers some of the questions are a bit vague for example the questions under the water, nature and land resources. Considers that questions should be direct. In section 3 and Table 3-2, notes how the assessment and results will be published. This is satisfactory. The impacts and effects identified under each objective and assessment is plausible regarding the environmental topics.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.

Table 2 - Disagrees that the sustainability objectives and impact pathways identified for each topic area in the SEA and SA scoping report adequately

Unique ID Reference	Summary of Issue	Response
CR6	No account of the Rights of Way improvement plan has been made, and no Access Impact Assessment has been made in relation to non-motorised users of the rights of way network.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR24	Concerns over air pollution in many of the areas proposed for minerals and waste sites and the effects this has on the health and mental wellbeing of residents.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR27	Concern that flooding has not been adequately addressed, particularly following large-scale mineral extraction.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR53	Considers that more recycling should be done, and that this should be looked at before more extraction takes place.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR50	Considers that as the document has been prepared to support the Minerals and Waste Local Plan it should therefore also measure if it meets the plan requirements of providing a steady and adequate supply of minerals and sufficient waste capacity that also moves waste up the Waste Hierarchy to meet waste targets.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR63	Considers that there needs to be an Environmental Impact Assessment for all stages of all hydrocarbon developments, whatever the size of the site.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.

Table 3 – Further/Other Comments

Unique ID Reference	Summary of Issue	Response
CR60	Considers that all applications for oil and gas exploration should be subject to a full EIA due to the processes involved regardless of the size of site – gives example of Dunsfold UK site not needing Environmental Impact Assessment.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
WR5	The Strategic Environmental Assessment and Sustainability Appraisal Scoping Report (October 2021) should be updated to also reference the Woking Site Allocations Development Plan Document 2021.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
W13	The council would like to highlight the slight inconsistency in the Sustainability Appraisal Objective relating to air quality and AQ3. In some sections of the appraisal, bioaerosols is included and in other sections, it is omitted.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
WR31	As part of the evidence gathering for the local plan, noise meters are erected in a sample of gardens backing onto the yard to ascertain noise and vibration levels, and whether these are a risk to human health and the long-term structure of the houses. If this evidence gathering is not undertaken, then we feel the impacts on the surrounding population will not have been assessed as required within the Strategic Environmental Assessment and any reallocation of the site will be unsound. The residents hope to secure at least one noise meter, but noise data will necessarily be of lower quality than the particulate matter data collected, due to professional noise meter costs.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.

Unique ID Reference	Summary of Issue	Response
WR53	Regarding the structure of the Environmental and Sustainability Report, suggests that the structure as in Section 1.9 (which outlines what the Strategic Environmental Assessment should include and cover) be adopted to ensure all these issues (as applicable to the Minerals and Waste Local Plan) are carried out in accordance with Schedule 2 of The Environmental Assessment of Plans and Programmes Regulations 2004 and presented in the Environmental and Sustainability Report as it progresses to the publication of a local plan – Regulation 19 stage. For example, issues such as mitigation proposals and compensation for significant adverse effects and monitoring measures on the performance of the plan must be included in the Strategic Environmental Assessment.	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.

## Annex J.2 – Equalities Impact Assessment

Unique ID Ref.	Summary of Issue	Response
CR50	Gave a rating of '2' for the question 'how useful did you find this?'	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.

## Annex J.3 – Story Map

Unique ID Ref.	Summary of Issue	Response
CR14, CR43	Gave a rating of '5' for the question 'how useful did you find this?'	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.

CR17, CR22, CR31, CR18, CR34	Gave a rating of '4' for the question 'how useful did you find this?'	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR27, CR46, CR50, CR51	Gave a rating of '3' for the question 'how useful did you find this?'	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR29, CR30, CR35, CR36	Gave a rating of '2' for the question 'how useful did you find this?'	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
CR70, CR41	Gave a rating of '1' for the question 'how useful did you find this?'	Comment(s) noted. Any issue(s) raised will be considered further and addressed as appropriate by the Minerals and Waste Planning Authority in preparing the Regulation 19 Draft Minerals and Waste Local Plan to be published in 2023.
