Surrey COVID-19 Summary

Cases and Rates

For more detail please see full report at www.surreycc.gov.uk/covidcases

Daily Cases

Change**

New cases in last 7 days

1,601

Rate for the last 7 days*

133.8

Data shown for time period Wednesday 23 June 2021 to Tuesday 29 June 2021

*Rate represents number of cases per 100,000 population for the last 7 days

**If there is an increase or decrease in cases that is less than 10% compared to the previous 7 days (16 June - 22 June) a grey arrow will indicate that the rate may have plateaued, but is not showing a significant rise or drop.

All data is publicly available. Data is shown by specimen date - reporting delays mean data can be incomplete for the most recent days. For this reason the data shown is for the seven-day period ending four days prior to the publication date.

The rate is calculated daily by Surrey County Council Public Health data intelligence team using the ONS 2019 mid-year population estimates.

The 7-day average line on the chart is calculated using the average of cases for three days before, the date itself and the three days after any specific date. The average is not calculated for the most recent three dates as there is not en..

Hospital Admissions

There were **111** people admitted to hospital with COVID-19 in the last 7 days (23rd June to 29th June) in the South East. This is **40** more admissions than the previous week (16th to 22nd June).

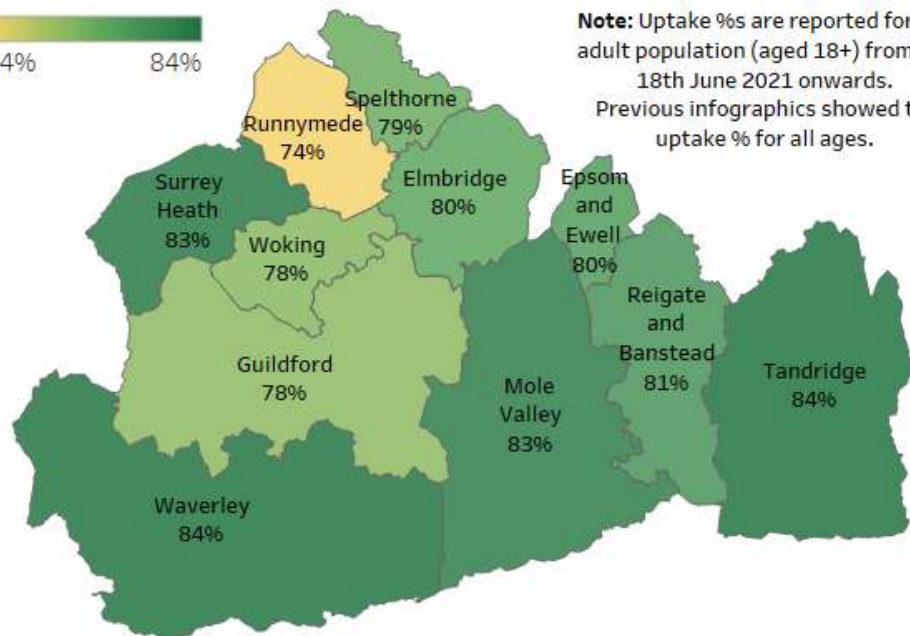

For a breakdown of hospital admissions by NHS Trust please see fu..

For a breakdown of vaccinations by cohort, please see full report at www.surreycc.gov.uk/covidcases

Vaccinations

Data up to 30 June 2021

Percentage of population who have had at least 1 dose of a vaccine

Note: Uptake %s are reported for the adult population (aged 18+) from the 18th June 2021 onwards. Previous infographics showed the uptake % for all ages.
