The bus improvements that we are proposing are focused along two main corridors plus the Ashford hospital interchange - as shown on the map.

These improvements aim to make travelling by bus a more attractive mode of travel. We want to encourage more people to commute to work using the bus, for example from Stanwell and Stanwell Moor to Staines town centre, Heathrow Airport or Ashford Hospital. This would help ease traffic congestion in the area during peak times.

Proposed improvements to all corridors could include:
• Upgrading existing bus shelters.
• Installing new shelters.
• Installing ‘Real Time’ information displays so passengers know when the next bus is due.
• Raising kerbs so they are level with the bus making it easier for people to get on and off.
• Better information at bus stops.

Proposed improvements to Ashford Hospital/Tesco bus facilities may include:
• Better bus stops outside the hospital and Tesco.
• Improved access for buses stopping at the hospital and Tesco to increase reliability.
• Installing a pedestrian crossing at the hospital junction to make it easier to get to the bus stop on the west side of Town Lane.

Improvements would also be made to the bus facilities directly outside the hospital and Tesco. These stops are currently very busy but have poor waiting facilities; during a 2014 passenger survey around one hundred passengers per hour were recorded using these stops.

The improvements would be made along the following routes:
• the 441 and the 446 – both of these routes use the A30 and stop at Ashford Hospital, on Clare Road, Hadrian Road, Park Road, Stanwell Moor, and go on to Heathrow or Hillingdon.
• the 203 and 555 both use the A30 and call at Ashford Hospital and stop on Clare Road, Bedfont Road and go on to Heathrow or Hounslow.

Turn to page 3 for map showing bus routes currently serving this area
This map displays all of the bus routes serving this area. The proposed improvements will be made to the bus facilities along the 441, 446, 203 and 555 bus routes.
