

# Woking Sustainable Transport Package January 2022 Newsletter

## New shelters being installed around Woking

*A new bus shelter installed at the Roffords stops on Marston Road, Goldsworth Park.*

Brand new bus shelters are now being installed as part of a package of measures to improve the accessibility and attractiveness of the bus network, which also includes raised kerbs to make stops more accessible, live departure information screens and measures to make bus stops more comfortable such as seating and lighting.

The installation of the new shelters will take place over winter, with all new shelters aiming to be in place by the end of January. New shelters are proposed at the following locations;

- Colliers Close bus stop (southwest bound towards Woking) on Sythwood, Goldsworth Park
- Watercress Way (southbound towards Knaphill) on Sythwood, Goldsworth Park
- Roffords bus stops (in both directions) on Marston Road, Goldsworth Park
- Chipstead Court bus stop (in both directions) on Creston Avenue, Knaphill

- Tregarth Place bus stops (in both directions) on Kirkland Avenue, Goldsworth Park
- Northwood Avenue bus stop (northbound towards Knaphill) on Lower Guildford Road, Knaphill
- The Surrey bus stop (eastbound towards Woking) on Hermitage Road
- Eastmeads bus stop (northwest bound towards Knaphill) on Marston Road, Goldsworth Park
- St John's Rise bus stop (eastbound towards Woking) on St John's Road, Woking
- The Vyne Centre for the Community bus stop (eastbound towards Knaphill) on Redding Way, Knaphill
- Barnby Road bus stop (northbound towards Knaphill) on Barnby Road, Knaphill
- St John's Health Centre bus stop (westbound towards Knaphill) on Hermitage Road, St John's

Two bespoke replacement wooden shelters will also be installed in St. Johns village in the following location;

- St John's Post Office/Co-op bus stops (in both directions) on St John's Road, St John's

These shelters will help improve the attractiveness of the local bus network both to those who don't currently use the bus network and those who already do. They will feature new seating, lighting and feature information about the local bus network for those who are considering opting to try the local bus network as a more sustainable means of making trips around Woking and the local area.

Following the installation of the new shelters, live departure information screens will be installed within many of these shelters to provide accurate, up-to-date departure information for passengers waiting at the stop and help to further improve the accessibility and attractiveness of bus travel in Woking.

## Stay up to date

This newsletter is correct as of 24 January 2022.

Regular updates and plans for the Woking Sustainable Transport Package project and all of Surrey County Council's other major transport schemes can be found on the [Major transport projects](#) web page (available on the Surrey County Council website).

For further information or to report problems associated with the works please call the Surrey County Council contact centre on (telephone) 0300 200 1003.
