## **Timeline: Developing the Discussion**

Initial discussion of topics of importance to inform the public engagement questionnaire development.

Discussion with the Stakeholder Group (and any parties members invite to contribute) continued via a Miro board.

Comments from the Miro board are developed into themes for discussion.

The group meeting is given over to prioritisation of the themes for discussion.

Prioritisation is conducted by structured comparison of relative importance by the stakeholder group. During the school summer holiday period the full engagement questionnaire will be developed based on the themes and prioritisation developed by the Stakeholder group.

Full public engagement commences September 2023, which will include the questionnaire developed through this process.

This process will ensure residents and the wider public are able to provide their views on the road scheme.
