How to connect to Pulse Secure (W7)

You will need to have a SCC laptop and an active VPN (Freja) token

Establish a wireless (WIFI) connection to the internet

Launch the shortcut for Pulse Secure in the task bar by clicking on the **Pulse Secure** icon

Click on **Open Pulse Secure**

Pulse Secure will open – select **connect**

Enter your LAN user name and password - select connect

Enter your secondary token information (Freja OTP)

A successful connection will be displayed in your task bar
