Many people look after friends or family who can’t manage without them. This could be due to a serious health condition, disability, mental health illness, frailty, addiction or substance misuse.

Being a carer can often affect your own health but your GP can support you if they know you care. Just fill in this form and hand it to a receptionist to register yourself as a carer.

For any additional guidance you can find the Carers Pathway on the Carers Prescription website.

Once a patient has registered as a Carer they can be referred to Carer support services through the Carers Prescription.

What happens next?

Please ask to be given ‘The Guide on Carers Support in Surrey’ and take a look at your surgery’s Carers Resource File.

If you feel that your health is suffering due to looking after someone, please make an appointment to see your doctor. Your GP can help you to look after your own health needs by having more knowledge of your caring role, perhaps with a Carers Prescription.

Please note: Completing this form does not automatically entitle you to have access to the medical records of the person you are caring for. Check your surgery policy regarding this.
